

**SNBT LITERASI BAHASA INGGRIS DAY 3, 25
APRIL 2025**

Sydney January 4, 2024	Does anyone else feel physically really unwell when they get episodes of high anxiety? I feel dreadful lately - very low mood, shaky, tearful, no energy, muscle tension, sore aching muscles, headaches, and a general feeling of sadness. I'm struggling day to day
Marco January 10, 2024	Absolutely. Anxiety and stress take a huge toll on the body. It can make you feel weak. among other things. I've had it all. Is there anybody you can talk to about what's causing the anxiety? I talk to a counsellor virtually once every couple of weeks and it really helps a lot to vent to somebody else who can help.
Olivia January 22, 2024	Why are you so negative? Life is beautiful. Learn to appreciate every little joy in life and be grateful that you are still alive.
Margareth January 24, 2024	Me too. Have you tried revisiting your doctor or consulting a different one? I am contemplating doing the same because anxiety can be incredibly exhausting
Cnythia January 27. 2024	I do. My lack of appetite has also left me feeling quite weak. Now, my mother has taken on the responsibility of caring for me, as I'm unable to go to work or manage my own household tasks. How are you today?
Zenith January 31, 2024	I understand where you're coming from. I feel the same. Anxiety and depression frequently coexist, and it's important to reach out to someone. It seems like you could benefit from some support. Don't attempt to handle everything by yourself since it can be overwhelming. I hope you start feeling better soon.
