Stormy 04-08-2024	Social media can be a tempting distraction. It's a pretty common experience to want to pick up your phone whenever you <u>can't</u> focus or need a quick break. But you <u>may</u> find yourself struggling with endless doomscrolling, waiting for messages or <u>comparing</u> yourself to others. How do you disconnect from social media?
Dewgong 05-08-2024	This is a great question! I'm going to be honest here and admit that I often fail at <u>disconnecting</u> from <u>social media</u> (<u>predominantly just</u> TikTok). But I am trying harder to set boundaries and give myself a break!
Lightning 07-08-2024	I <u>deleted</u> Instagram a few weeks ago and have found a profound <u>impact</u> on my <u>mental health</u> . Since <u>deleting</u> it, I am not <u>constantly</u> comparing myself to others anymore. I can appreciate little things more as I'm not bombarded with information.
Infinity 16-08-2024	For me, I am not active on social media but yes, as you said sometimes we keep <u>scrolling</u> and <u>watching</u> . I noticed I was <u>spending hours of my time</u> scrolling through reels to wind down, <u>only to realize I had wasted my time</u> .
Ironman 20-08-2024	Thanks for posting about this! I often find myself doomscrolling social media during the night when I <u>feel like I haven't found time</u> for myself during the day. It definitely has had impacts on my sleep schedule and I'm not proud of it, but I <u>have been able to reduce</u> the use of social media in the past few months.
Golden 28-08-2024	This is a really good post. I am curious to hear what others have to say on the topic. I <u>definitely could use less</u> social media <u>by installing Flora</u> app that helps you stay off your phone, but this is <u>still a work in progress</u> .

1. Who posted the negative effect of social media on their lives?
 - a. Dewgong and Golden
 - b. Lightning and Ironman
 - c. Lightning and Dewgong
 - d. Infinity and Golden
 - e. Ironman and Golden

Learning

Pembahasan:

Dalam kutipan percakapan di atas, sekelompok orang membahas tentang bagaimana media social dapat menjadi distraksi dan cara menghadapinya. Beberapa dari mereka, yakni Lightning dan Ironman membagikan ceritanya dalam menghadapi efek negative yang muncul dari media social secara jelas.

2. The word may in Stormy's post is used to express a ...

- a. Possibility - kemungkinan
- b. Permission
- c. Wish
- d. Suggestion - saran
- e. Request = permintaan

Pembahasan:

Kata 'may' dalam kalimat "But you may find yourself struggling with endless doomscrolling.." menunjukkan adanya kemungkinan seseorang kesulitan dengan doomscrolling dan dampak negative media social lainnya. Oleh karena itu, kata 'may' menunjukkan possibility atau kemungkinan.

3. Which of the following issues is stated at the beginning of the thread?

- a. Talking about experiences on handling distractions
- b. Asking for a suggestion to focus on work
- c. Finding a solution for not comparing oneself to others
- d. Sharing tips on limiting the use of social media
- e. Discussing issues related to the use of social media

Pembahasan:

Di awal percakapan, pembicara pertama (Stormy) memulainya dengan membahas isu-isu terkait penggunaan sosial media yang berdampak negatif pada manusia. Oleh karena itu, jawaban yang benar adalah opsi E.

4. Who shared the positive impact of disconnecting from social media by giving evidence?

- a. Dewgong
- b. Lightning
- c. Infinity
- d. Ironman
- e. Golden

Pembahasan:

Lightning menjadi satu-satunya pembicara yang membagikan dampak positif dari berhenti menggunakan media sosial dengan memberikan bukti yang terlihat pada "**Since deleting it, I am not constantly comparing myself to others anymore. I can appreciate little things more** as I'm not bombarded with information." Maka, jawaban yang benar adalah opsi B.

5. The aim of Golden's response to Stormy's post is to ...

- a. Find other solutions to disconnect from social media
- b. Talk about his/her experience in using social media
- c. Share one effective way to limit social media use
- d. Introduce an app to maximize social media use
- e. Show how to create a social media apps

Pembahasan:

Dalam kutipannya, Golden membagikan pengalamannya dalam mengurangi media sosial dengan menginstall Flora App. Meskipun masih dalam proses, ini merupakan salah satu cara efektif untuk membatasi penggunaan media sosial. Jadi, jawaban yang tepat adalah C.

6. Who posted the most relevant answer to Stormy's question?
- a. Dewgong and Lightning
 - b. Dewgong and Infinity
 - c. Lightning and Golden
 - d. Infinity and Ironman
 - e. Ironman and Golden

Pembahasan:

Pembicara yang paling relevan dalam menjawab pertanyaan Stormy adalah Lightning dan Ironman. Namun, sayangnya, tidak ada opsi tersebut dalam jawaban. Maka dari itu, Lightning dan Golden dapat menjadi opsi yang mendekati jawaban benar.

7. What is the tone of the thread?
- a. Professional
 - b. Emotional
 - c. Sarcastic
 - d. Provocative
 - e. Introspective

Pembahasan:

Keseluruhan nada bicara dari percakapan ini adalah **introspective**, dengan para pembicara membahas dampak negatif dari media sosial dan cara menghadapinya. Hal ini menunjukkan adanya refleksi antara satu pembicara dan pembicara lainnya. Oleh karena itu, jawaban yang tepat adalah opsi E.

Read the two texts below to answer the questions number 8 to 14. Text 1

At Frieze London this year, three large artworks by the artist Nengi Omuku were hung away from the walls so viewers could walk around them. With each work, one side offered a vibrant nature-filled painting. The other presented strips of sanyan, a thick traditional Nigerian fabric that Omuku uses to replace the usual canvas fabric painters often used as their base. "The fact I'm painting on a vintage surface gives soul to my work," Omuku said over Zoom two days before the fair opened. For the 37-year-old, the fabric she works on has become as crucial as her paintings themselves. "Even when it's not a vintage surface, it is a surface that has been made collaboratively with craftsmen from Nigeria."

Omuku's reason to use sanyan initially came from a place of necessity, but has now become an integral part of her practice. "I worked on canvas for a little while, but eventually shifted to working on sanyan, which is a pre-colonial Yoruba textile," she told CNN in a video call, adding that she "made the switch" after eight years of studying in the

soul

UK. "I was trying to rediscover myself and my identity," she said. "When I moved back to Nigeria, I couldn't find high-quality canvas, and I was also really fascinated by how, as Nigerians, we identify ourselves through our clothes." However, she found sanyan more appealing than other more contemporary fabrics. "I'd never seen a pre-colonial Nigerian textile before, and it looked quite similar to linen."

Text 2

When a banana duct-taped to a wall sold for \$120,000 in 2019, social media uproar and an age-old debate about the meaning of art ensued. However, artist Maurizio Cattelan's surreal creation, titled "Comedian", may yet prove a sound investment. On Friday, auction house Sotheby's announced 1 million to \$1.5 million. I doubt that it will be sold at this high price.

For their money, the winning bidder will receive a roll of duct tape and one banana. They will also receive a certificate of authenticity and official instructions for installing the work. Sotheby's confirmed to CNN that neither the tape nor the banana are the originals. "Comedian" is a conceptual artwork, and the physical materials are replaced with every installation," an auction spokesperson said via email.

Cattelan and French art gallery Perrotin made headlines around the world five years ago when they displayed "Comedian" with a six-figure asking price at the Art Basel Miami Beach fair. The original was created using a banana bought in a Miami grocery store, though the gallery said it could be replaced, as per the artist's instruction's.

8. According to Text 1, which of the following is NOT the reason why sanyan is used by Nengi Omuku? It ...
- a. is a high-quality canvas
 - b. is a thick Nigerian fabric
 - c. gives soul to the painting
 - d. is a pre-colonial textile from Nigeria
 - e. has a better quality compared to linen

Pembahasan:

Opsi A benar karena alasan Omuku menggunakan sanyan adalah karena kesulitan mencari kanvas yang berkualitas. Selanjutnya, sanyan bukan merupakan kain sejenis kanvas, melainkan lebih mirip linen. Sementara itu, opsi B, C, D, dan E benar karena terdapat dalam teks.

need = kebutuhan.

9. The phrase "a place of necessity" in Text 1 Paragraph 2 is closest in meaning to ... an urgent need.
- a. A practical
 - b. A long-term
 - c. A high-quality
 - d. A possible
 - e. An urgent

Pembahasan:

Frasa "a place of necessity" dapat diartikan sebagai "kebutuhan yang mendesak" atau "hal yang sangat diperlukan". Maka dari itu, opsi E benar karena menggunakan kata 'urgent' yang bermakna 'mendesak' atau 'darurat'.

10. Which of the following is the best main idea of Text 1?

- a. There are some reasons why sanyan is selected by Nengi Omuku as the fabric of her paintings.
- b. The artist Nengi Omuku prefers to use materials from her own country because of its quality.
- c. For Nengi Omuku, the fabric chosen is less important compared to the painting itself.
- d. The use of sanyan by Nengi Omuku is meant to popularize it among painters.
- e. Sanyan is as good as canvas to be used as the base of painting.

Pembahasan:

Kalimat yang paling tepat untuk menjadi ide pokok Teks 1 adalah opsi A karena pada teks tersebut menjelaskan beberapa alasan kenapa Omuku memilih sanyan sebagai kain untuk lukisannya. Opsi B tidak cukup untuk menjadi main idea karena merupakan supporting ideas. Sementara itu, opsi C, D, dan E tidak tepat karena tidak terdapat di dalam teks.

11. Which of the following best restates the statement "They will also receive a certificate of authority and official instructions for installing the work." in Text 2 Paragraph 2?

- a. The work should be installed by paying attention to the original guidelines received and the original certification issued.
- b. A certificate of authenticity will also be given, and to install the work, they should ask the official who writes the manual.
- c. A document of originality and authorized directions for putting the work in place will also be given to them.
- d. A letter of originality that contains the formal directions to build the work will also be given to them.
- e. To set the work in place, formal instructions and license will also be provided.

Pembahasan:

Opsi C benar karena menyatakan kembali makna dari kalimat "They will also receive a certificate of authority and official instructions for installing the work." yakni, pemenang lelang akan diberikan dokumen keaslian dan petunjuk resmi untuk memajang karya tersebut.

12. According to Text 2, the purpose of providing a certificate of authenticity is to ...

- a. State that the artwork is genuine
- b. Provide directions to install the artwork
- c. Inform that the artwork uses real materials
- d. Help the owner get a new buyer in the future
- e. Explain that "Comedy" is a conceptual artwork

Pembahasan:

Jawaban yang benar adalah opsi A karena mengandung makna bahwa pemberian sertifikat ditujukan untuk menyatakan bahwa karya tersebut asli, walaupun materinya diganti. Hal ini karena pemenang lelang mendapatkan "konsep" dari seni tersebut, hanya mengubah materinya. Opsi B, C, D, dan E salah karena tidak menyampaikan makna asli kalimat.

13. Which of the following statements from Text 2 shows the author's negative attitude toward the value of the artwork?

- a. When a banana duct-taped to a wall sold for \$120,000 in 2019, social media uproar and an age-old debate about the meaning of art ensued. (Paragraph 1)
- b. I doubt that it will be sold at this high price. (Paragraph 1)**
- c. For their money, the winning bidder will receive a roll of duct tape and one banana. (Paragraph 2)
- d. Sotheby's confirmed to CNN that neither the tape nor the banana are the originals. (Paragraph 2)
- e. Cattelan and French art gallery Perrotin made headlines around the world five years ago when they displayed "Comedian" with a six-figure asking price at the Art Basel Miami Beach fair. (Paragraph 3)

Pembahasan:

Opsi B benar karena penulis menyampaikan opini nya yang merupakan keraguan dan terkesan meremehkan (negative statement). Opsi A, B, C, D, dan E salah karena merupakan fakta.

14. Which of the following is the best synthesis of the two texts?

- a. Materials can be so important in artworks like Nengi Omuku's paintings, that they are not replaceable, but in the case of "Comedian" by Maurizio Cattelan, the material can be replaced with every installation.**
- b. Nengi Omuku spent a lot of time looking for appropriate fabric for her artwork while Maurizio Cattelan did not really think of it as something which is important.
- c. Nengi Omuku and Maurizio Cattelan believe that physical materials of their works should always be of high-quality to produce excellent artworks.
- d. Nengi Omuku and Maurizio Cattelan used different tools in producing their artworks, but both share an attachment to their ethnic identities.
- e. Both Text 1 and Text 2 discuss the value of integrating excellent physical materials in creating beautiful artworks.

Pembahasan:

Sintesis bermakna penggabungan informasi dari berbagai sumber untuk membentuk wawasan atau argumen baru. Dari Teks 1 dan 2 dapat dihasilkan informasi baru, yakni "bahan-bahan dapat menjadi unsur penting dalam karya seni seperti lukisan Nengi Omuku, sehingga tidak dapat digantikan, tetapi dalam kasus "Comedian" karya Maurizio Cattelan, bahan-bahan tersebut dapat diganti pada setiap instalasi." Maka, opsi A benar.

Read the two texts below to answer questions number 15 to 20.

Text 3

Scientists have made a new type of nanogenerator. These devices are very energy efficient and flexible. It can increase power density 140 times more than regular ones. They think this could make small devices as good as today's solar panel. The new nanogenerator can turn small movements, like walking or opening a door, into a lot of electricity. For example, if a regular nanogenerator makes 10 milliwatts, this one can make over 1,000 milliwatts.

The nanogenerator works like a relay race. Instead of one part passing energy atoms, each part collects and adds energy before passing it on. This boosts the total energy collected. This process is called the charge regeneration effect. The lead researcher said they wanted to capture energy from everyday movements, like running, walking, or waves. Their device uses 34 tiny energy collectors, improved with a laser technique, which can be made in large numbers.

3 - 3 ✓ This type of nanogenerator is called a triboelectric nanogenerator (TENS). It turns simple movements into electricity by using special materials. These special materials get electrically charged when they touch and separate, line how a balloon sticks to hair. The researchers said they would start a company to make healthcare sensors using this technology.

It is also said that with more technology, soon there would be over 50 billion devices needing power. Local green energy solutions are important to ensure sustainable future. This technology can use mechanical movements to power small devices. It could be used in smart homes, security systems, and healthcare to help patients.

Text 4

1 - 1 ✓ The triboelectric effect happens when two materials touch and then separate. It is like when you rub a balloon on your hair and it sticks because of static electricity. When two different things touch, electrons move from one to the other. This makes one thing positively charged and the other negatively charged. This effect builds up these charges.

Triboelectric devices, also called triboelectric nanogenerator (TENG), use this effect to make energy. They use the static charge made when materials touch and then separate. TENG can change mechanical energy from movement or vibration into electrical energy. These devices are made of pairs of materials with opposite triboelectric properties. When they touch and then separate, they create voltage and current, which can be used to make energy.

Triboelectric devices have many uses. They can turn energy from everyday activities, like walking, into power for small gadgets. TENG can also change body movements into electricity for small usable devices. By using energy from wind or water, they can help sensors monitor the movements.

This technology can run gadgets that power themselves. The use of TENG in various devices can reduce or even replace the use of conventional batteries. Furthermore, this means reducing the waste from conventional battery products.

15. According to Text 3, a triboelectric nanogenerator (TENG) generates electricity when the nanogenerator materials ...

- a. Produce electrical power from sensors like a balloon sticks to hair
- b. Work like an open door and collect energy using laser technique
- c. Are driven by regular daily movements
- d. Come into contact and separate
- e. Use the laser technique

touching

Pembahasan:

Opsi D benar karena pada teks 3 paragraf 3 terdapat kalimat "These special materials get electrically charged when they touch and separate, line how a balloon sticks to hair." yang menyatakan bahwa TENG menghasilkan listrik ketika material nanogenerator bersentuhan dan berpisah.

16. The word They in Text 4 Paragraph 3 refers to ...

- a. Small wearable devices
- b. Triboelectrical devices
- c. Everyday activities
- d. Body movements
- e. Small gadgets

↳ Kognitif

Pembahasan:

Opsi B tepat karena kata ganti 'they' pada teks 4 paragraf 3 merujuk pada 'perangkat triboelektrik' yang dijelaskan di kalimat sebelumnya. Sementara itu, opsi A, C, D, dan E tidak tepat karena tidak mewakili kata ganti 'they.'

17. Information about how the triboelectric nanogenerator can produce electricity can be found in ...

- a. Text 3 Paragraph 1 and Text 4 Paragraph 1
- b. Text 3 Paragraph 1 and Text 4 Paragraph 2
- c. Text 3 Paragraph 2 and Text 4 Paragraph 4
- d. Text 3 Paragraph 3 and Text 4 Paragraph 1
- e. Text 3 Paragraph 3 and Text 4 Paragraph 4

Pembahasan:

Tidak ada jawaban yang benar dalam opsi. Namun, terdapat pilihan jawaban yang mendekati, yakni opsi D yang menunjukkan bagaimana triboelectric nanogenerator dapat menghasilkan listrik.

18. What is the relationship between Text 3 and Text 4?

- a. Text 3 explains the development of energy source devices whose energy generation mechanism is further described in Text 4.
- b. Text 3 illustrates various daily activities that can generate electricity through the triboelectric effect elaborated in Text 4.
- c. Text 3 describes the potential use of energy sources from triboelectric materials with the development process discussed in Text 4.
- d. Both texts predict the success of the development of electrically generated materials from the triboelectric effect.
- e. Both texts explain the development of electrical instruments that are produced from the triboelectric effect.

Pembahasan:

Opsi A benar karena menunjukkan hubungan antara Teks 3 dan Teks 4, yakni Teks 3 menjelaskan perkembangan perangkat sumber energi, yang mekanisme pembangkitan energinya dijelaskan lebih lanjut dalam Teks 4.

19. Based on the two texts, which of the following will most likely happen in the future?

Scientists will ...

- a. find a cheaper triboelectric effect mechanism that can be an alternative for conventional batteries.
- b. be able to explain the mechanism of generating electrical energy from the environment.
- c. develop solar panels that work as an environmentally friendly energy source.
- d. produce conventional batteries that use greater electrical power and are environmentally friendly.
- e. be able to develop a triboelectric nanogenerator that produces greater electrical power for use in a variety of devices.

Pembahasan:

Dari kedua teks tersebut, dapat diperkirakan bahwa di masa depan, ilmuwan dapat mengembangkan *triboelectric nanogenerator* yang menghasilkan energi listrik yang lebih kuat untuk penggunaannya dalam berbagai perangkat.

20. Based on Text 3 and Text 4, which of the following recommendations is appropriate to be implemented?

- a. The Triboelectric Nanogenerator should operate by limiting mechanical energy obtained from human daily activities.
- b. Small electronic devices must utilize traditional batteries as a power source for human daily activities.
- c. Electronic devices that use energy from the triboelectric effect mechanism should be continually developed to support green energy.
- d. The Triboelectric Nanogenerator in small electronic devices should use solar panels as an energy source.
- e. Small wearable devices should be used to convert electrical energy into mechanical energy to support green energy.

Pembahasan:

Dari Teks 3 dan Teks 4, dapat diberikan saran atau rekomendasi untuk diimplementasikan, salah satunya adalah perangkat elektronik yang menggunakan energi dari mekanisme efek triboelektrik perlu terus dikembangkan untuk mendukung pemanfaatan energi hijau. Jadi, jawaban yang sesuai adalah opsi C.
